

# SAMBHAJI SHINDE

sambhajishinde725@gmail.com | (+91) 7558561214

## ABOUT ME

A passionate React and Django developer with expertise in building dynamic web applications, integrating machine learning models, and performing data analysis. Proficient in crafting scalable, user-friendly solutions and deriving actionable insights from complex datasets to drive impactful results.

## EDUCATION

- Artificial Intelligence and Data Science CGPA: 8.68 | (Nov 2022-Present)  
Maharashtra Institute of Technology
- Diploma in Information Technology 86.38% | July 2022  
Government Polytechnic, Nanded

## ACADEMIC PROJECTS

- ChatMe – Real-Time Chatting Application [ [visit](#) ]**  
A Django-based real-time chat platform enabling instant communication through WebSockets. Features include multiple chat rooms for organized discussions, offering a seamless and dynamic messaging experience for collaborative projects or social interactions.
- ApproveAI - Loan Approval Prediction Web App [ [visit](#) ]**  
A web application that predicts loan eligibility using a machine learning model (SVM). It offers real-time predictions and visualizes prediction probabilities through interactive bar charts. Key features include dynamic frontend with React.js, secure backend with Django, and data storage using MySQL.
- MoodLens - Sentiment Analysis Web App [ [visit](#) ]**  
A web app for real-time sentiment analysis of text data, offering insights into customer feedback, product reviews, and social media comments. It classifies sentiments as Positive or Negative using a Logistic Regression model. Features include a responsive frontend with React.js, robust backend with Django, and Python-based text preprocessing.
- ZeroSpamAI - Spam Email Classification Web App [ [visit](#) ]**  
A machine learning-based email spam detection system that offers real-time classification of emails to improve productivity. It features a React.js frontend, Django backend, and uses a Multinomial Naive Bayes (MultinomialNB) model for spam filtering.
- Emanage - Employee Management System [ [visit](#) ]**  
A full-stack web application for efficient employee data management, offering CRUD operations and PDF report generation. Features include secure data handling, scalable database integration, and seamless front-end (React.js) and back-end (Django) functionality.

## SKILLS

- Soft Skills:** Communication, Problem-Solving, Teamwork, Leadership, Management, Adaptability.
- Hard Skills:** Python, Django, Data Analysis, Data Visualization, Data Processing, MySQL, Javascript.

## ACHIEVEMENTS

- Earned the Warrior and Fledgling Badges from Infosys for exceptional problem-solving skills and consistent progress in foundational tasks.
- Earned IBM badges in EDA for ML, Software Engineering, and Deep Learning, highlighting skills in data analysis, system design, and AI deployment.
